EDUCATION

Lipa City Colleges Lipa City
Bachelor of Science in Computer Science June 2025

- Best Thesis Awardee 2025
- Dean's Lister
- 2022 Department Coding Skills Champion (JavaScript)

EXPERIENCE

Freelance WFH - International
Digital Media & Advertising Specialist Aug 2025 – Feb 2026

- Managed end-to-end TikTok Ads campaign setup across 20+ accounts, handling ad configuration, audience targeting, and redirecting live ad traffic to designated client landing pages.
- Consistently achieved CPA under $0.15 on sales and lead generation campaigns.
- Edited and published 500+ long-form YouTube videos, managing end-to-end production workflows using Trello.

Pilipinas Kyohritsu Inc. Lipa City
Information Technology Intern Jul 2024 – Aug 2024

- Provided hands-on support resolving 30+ hardware and software tickets across multiple departments.
- Configured and deployed 20+ desktop systems and basic network setups for day-to-day operations.
- Reduced workstation setup time by 40% by optimizing the imaging and deployment process, cutting average setup from ~50 minutes to ~30 minutes per unit.

SKILLS

Languages, Technologies, & AI: Python, Javascript, PHP, C++, HTML, CSS, Bootstrap, Django, Machine Learning, Model Training, Data Preprocessing
Web & Dev Tools: Google Workspace, cPanel, Web Hosting Management, GitHub, Git
IT Support: Hardware Troubleshooting, Software Installation, Basic Network Configuration, System Deployment

PROJECTS

SIGNED: Sign Language Tutorial

- Built an interactive sign language learning platform in Python and Django with gesture recognition, supporting 60+ sign language gestures across 3 difficulty levels.
- Implemented and benchmarked Random Forest vs. SVM; SVM achieved ~92% gesture recognition accuracy, outperforming Random Forest by approximately 8 percentage points.

ARGUEL: Summarizer

- Developed a BERT-powered summarization tool capable of condensing documents by up to 70% while retaining key information, tested on texts averaging 1,000+ words.
- Built with Python, Django, and NLP preprocessing pipelines, reducing average reading time from ~5 minutes to under 2 minutes per document.

FIFO Inventory System

- Built a full-stack inventory system with First-In, First-Out (FIFO) logic, rollback support, and 5 core modules covering inventory, sales, purchases, adjustments, and user management.
- Designed a flexible role-based access control system in PHP, JavaScript, and Bootstrap, supporting Admin and User roles where Admins can granularly configure module-level permissions per user.
